Gentlemen:

We reply to your request for clarification on the news article entitled "DMCI plans P14B power plant" published in the May 6, 2016 issue of the Malaya Business Insight. The article reported in part that:

"CONSUNJI-LED power generation firm DMCI Power Corp. plans to set up 100 megawatts (MW) run-of-river hydro power plants in Cagayan de Oro and Sultan Kudarat that could cost a total of P14 billion.

'The Cagayan de Oro project (that could reach up to 9 MW) is owned by another group and we're looking at buying in. It has an expired service contract but they are already renewing it,' Nestor Dadivas, DMCI Power president, said in a briefing in Makati City.

'The Sultan Kudarat project, meanwhile, is located inside our logging concession which could be about 90 MW from three to four different areas,' Dadivas said.

He added the company is specifically looking at hydro among other renewable energy sources as it has better capacity factor than solar and biomass plants.

.....

The company, citing government data, said on average, hydro projects have capacity factor index of 46 percent and per megawatt cost \$3 million.

If the plans proceed, this would be DMCI Power's first venture into hydro plants as it is currently involved only in diesel-fired and coal plants.

Dadivas said the projects are now undergoing due diligence as more studies are still needed to assure that the capacity factor of the proposed plants will be enough to become profitable.

. . . .”

We would like to confirm that our wholly-owned subsidiary DMCI Power Corporation is in exploratory discussions for hydropower plant projects in the Mindanao region. Legal, financial and technical due diligence are also ongoing to ensure the feasibility and profitability of the projects.

We hope this clarifies the matter.

Thank you.
