Attention: JANET A. ENCARNACION  
Head, Disclosure Department

Gentlemen:

We reply to your request for clarification on the news entitled "DMCI building 46-MW diesel plant in Batangas" posted in The Standard (Internet Edition) on February 3, 2016. The article reported in part that:

"DMCI Power Corp. of the Consunji Group is putting up a 46-megawatt diesel-fired power plant in Calaca, Batangas that is expected to be completed by the end of the year.

Energy Department records showed the company received a clearance in October 2015 to conduct the grid impact study for the aero-derivative power plant that is estimated to cost P1.5 billion.

. . . .

DMCI Power chairman and chief executive Isidro Consunji confirmed that the construction of the project had started, when asked for comment.

'Actually, it's diesel-fired [with] aero derivative engine. Location is Calaca. It will be operational by the end of this year,' Consunji said.

. . . ."

We would like to confirm the above statements in the said news article. In addition, we wish to clarify other portions in the article as follows:

1. DMCI Power Corporation and DMCI Masbate Power Corporation is putting up a 46- megawatt diesel-fired power plant in Calaca, Batangas xxx".
2. DMC1 Power, upon the Resolution of the Sangguniang Panlalawigan of Palawan and through Memorandum of Agreement with Palawan Electric Cooperative (PALECO), is scheduled to deploy existing and install newly-purchased 4.34MW high-speed diesel generating sets in Brooke's Point.
3. Another diesel plant with a capacity of 3 megawatts has been operational in Sultan Kudarat since December of last year".

We hope this clarifies the matter.

Thank you.
